

The Foundation of Agency Management

MedShare HC is a comprehensive business platform designed specifically for the home health care sector. MedShare HC includes client management, scheduling, billing, payroll, advanced reporting features and unlike older systems, it includes full electronic medical record (EMR) support.

With MedShare HC, your agency will immediately reduce paperwork, spend less time on administration, produce more accurate information, and enhance communication and collaboration among agency staff and health care workers.

MedShare HC is the foundation for your mobile point-of-care solutions.

Features

❖ Clients

- ▶ Easily access and manage client referrals, service orders, and visit information.
- ▶ Use the communication log to capture and track exchanges of information related to client care.

❖ EMR

- ▶ Full electronic medical record support including images, sounds clips, video clips, and various document formats.

❖ Scheduling

- ▶ Intuitive Outlook-style calendar allows administrators and workers to schedule visits in a shared calendar.
- ▶ Find the right caregiver for a client using our flexible matching tool.

❖ eCharting

- ▶ Replace paper forms with shareable, secure electronic forms.
- ▶ eCharts support everything from complex assessments to client consent forms.

❖ Billing

- ▶ Generate invoices and export electronic billing files, Log payments and track accounts receivable.

❖ Payroll

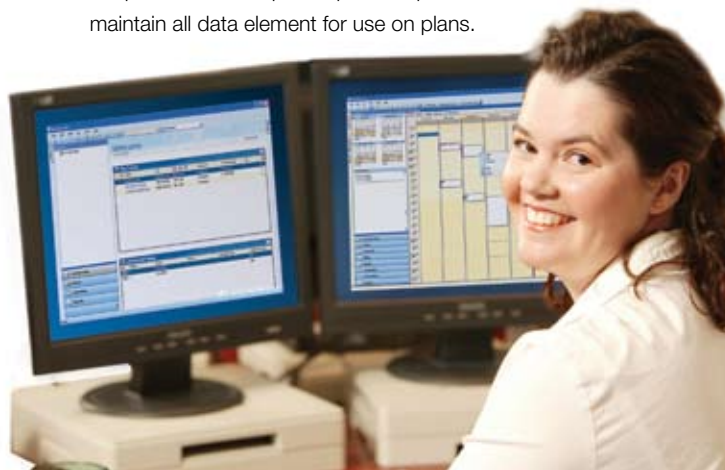

- ▶ Generate payroll for worker's visits and expenses, and easily generate pay statements.
- ▶ Support for full-time, part-time, and fee-for-service models

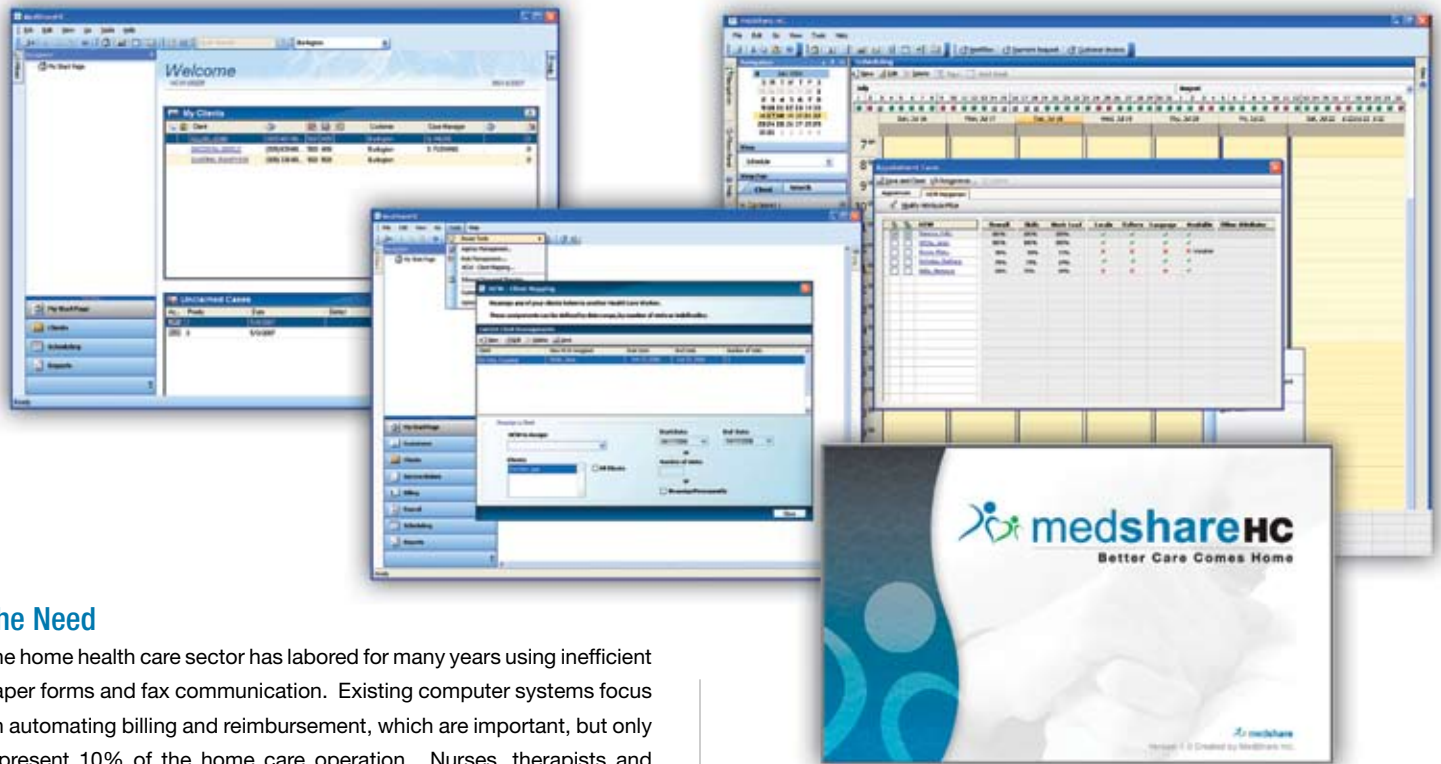

❖ Reports

- ▶ Choose from standard, custom, and ad hoc reports including drill-downs, dynamic filtering, sorting and grouping.
- ▶ Have reports delivered directly to your inbox.

❖ Care Plans

- ▶ Eliminate paper-based care plans. Complete client care plans electronically and save to their EMR.
- ▶ Maintain changes to the care plan over the entire service period.
- ▶ Allows admin staff to create customer specific layout templates, service specific plan templates and maintain all data element for use on plans.

The Need

The home health care sector has labored for many years using inefficient paper forms and fax communication. Existing computer systems focus on automating billing and reimbursement, which are important, but only represent 10% of the home care operation. Nurses, therapists and allied health professionals account for 90% of the workforce and 100% of the revenue of the agency.

The Solution

Electronic health information makes our whole health care system more efficient and cost-effective. It gives caregivers more time to do what they do best - deliver care to their clients. It gives managers access to timely and accurate information and it simplifies essential processes like scheduling, billing, payroll, and invoicing. The electronic medical record (EMR) itself improves the accuracy of clinical data and enhances collaboration within health care teams.

Rand research shows that home care agencies can improve operational efficiency by over 37% with the implementation of a full electronic medical record system.

MedShare HC provides the administrative foundation to improve quality of care by integrating traditional agency management functions with an advanced EMR solution.

Benefits

- Enhanced quality of care
- Greater data accuracy
- Improved attraction and retention of staff
- Competitive differentiation
- Increased productivity
- Foundation for mobile technology
