

Better Outcomes – for clients, for caregivers, for Home Health Care Agencies.

MedShare is a software company providing electronic information management and e-health record (EHR) solutions to meet the business and clinical needs of Home Health Care Agencies.

MedShare was founded to fill the gap left by other providers of information systems, who have designed more general technologies to meet the needs of the health care industry's larger players – hospitals, pharmacies, laboratories and HMOs. MedShare – and our flagship suite MedShare HC – is exclusively designed for the home health care sector, helping Home Health Care Agencies effectively manage their business needs.

MedShare gives us the peace of mind in knowing that everyone is current on the latest information and procedures and our clients are getting optimal care, no matter where they live in our geographical service area.

Christine Reno O.T. Reg. (Ont)
Business Director, Therapy Partners Inc.

MedShare. Making Home Health Care Agencies more efficient – more effective – more profitable.

MedShare solutions make Home Health Care Agencies run more effectively – in both administration and clinical care. So home care workers spend less time on paperwork and more time caring for their clients.

So clients get better care. And home care workers get more job satisfaction.

Because information shared electronically is more accurate and can be better managed and accessed, agencies gain efficiencies. More efficiency means more accurate budgeting and estimating, more rational staff assignments and scheduling, better cost control, faster and more accurate invoicing, and the ability to service more clients.

MedShare is committed to better outcomes across the home health care sector – for agencies, health care workers and clients.
